

## **Green4Future Project Showcased at the TCA Sustainability Event in Munich**

Posted on [June 17, 2023](#) by [admin](#)

We extend our heartfelt gratitude to the National Agency at the Federal Institute for Vocational Education and Training (BIBB) for affording us the opportunity to participate in the Transnational Cooperation Activity (TCA) focused on Sustainability in Munich from June 14th to June 16th. The experience was nothing short of inspiring and enriching!

The TCA offered a plethora of open spaces and discussions, allowing us to delve deeply into the realms of sustainability and sustainable mobility within Erasmus+ projects. It was truly impressive to witness passionate individuals from various countries come together to share their ideas and experiences in pursuit of a more sustainable future.

A particular source of pride for us was the presentation on Green Entrepreneurship and the Green Entrecomp Framework, which was developed within our Green4Future project. The discussion surrounding the insights and progress of our project was truly stimulating. Through our collective efforts in the project, we have worked towards crafting innovative solutions for eco-conscious entrepreneurship and empowering young individuals to engage in this domain.

We extend our heartfelt appreciation to all those who contributed to making this event an engaging and insightful experience. Together, we are forging a path towards a greener future.
