Green-4-Future

Greening the EntreComp Framework to Reconcile Economic Development and Environmental Security

Two Transnational Training events for VET tutors

In a significant step towards fostering sustainability education, two transnational training events were successfully conducted at **University Paderborn, Germany**, focusing on equipping Vocational Education and Training (VET) tutors with the skills to integrate the **IO1 -GreenEntreComp Framework and IO2 - Business Modelling for Circular Economy** into their teaching methodologies.

The events in February and April 2023 drew VET professionals from partner countries, providing them with an immersive learning experience to effectively incorporate environmental awareness and entrepreneurship principles into their curricula.

Participants engaged in workshops, discussions, and practical exercises that facilitated a comprehensive understanding of the framework's core concepts and application techniques. **The training aimed to enhance the tutors' capacity to guide students in sustainable business practices, eco-friendly innovation, and responsible resource management.**

The training events not only strengthened the competencies of VET tutors but also served as a platform for cross-cultural exchange and collaboration. Attendees networked with peers from diverse backgrounds, fostering a community of educators dedicated to promoting environmental consciousness in the workforce of tomorrow.

Final Partner Meeting in Paderborn

The **Final Project Meeting in Paderborn**, Germany was held from the **26th to the 28th of June 2023**. The meeting was hosted by the **University of Paderborn.**

On the first half of the meeting day, the partners presented and discussed the status of the Green-4-Future project in general, including the overview of the IOs and the project website as well as the status of the project in each partner organization. Since the **IO1 – GreenEntreComp Framework, IO2 - Business Modelling for Circular Economy Businesses, and IO3 In-service Training for VET Tutors** are already finished, partners focused on finishing the **IO4 - Green-4-Future MOOC.**

The second day was reserved for planning the **dissemination and exploitation** of the project, defining the project timeline, and working plan. Overall, it was a very insightful and productive partner meeting!

Green-4-Future

Final Project Conference in Paderborn

The **Final Project Conference in Paderborn**, Germany was held on the **28th of June 2023**. The conference was hosted by the **University of Paderborn.**

Speakers from all partner countries presented the general results of the project and shared experiences from their countries regarding the implementation of the results on the local level. There were many questions from the audience, and suggestions on the direction of the development next project. T was beneficial to see from the third party what is done exceptionally well and what can be developed further.

State of the Intellectual Outputs – Ios

We are proud to announce that **IO1 – GreenEntreComp Framework, IO2 - Business Modelling for Circular Economy Businesses, IO3 In-service Training for VET Tutors, and IO4 - Green-4-Future MOOC** are completed.

Next steps

Unfortunately, this is our last month on the project. Partners are preparing the closing of the project and gathering the documents for the report. The project partnership was successful and hopefully, we'll all work together again soon.
