G4F - IO2_Value proposition - UPIT.docx [Read-Only] - Word
Dumitru CHIRLESAN
Introduction
The European Green Deal sets out ambitious targets for the next generations. iVET and cVET providers will have a significant role to play in supporting the new green objectives of all EU Member States.
VET tutors will be the key front-line staff tasked with implementing essential training programmes to support a more sustainable economic model.
Supporting their continuous professional development through topic specific in-service training is the first essential non-regulatory step to reforming business practice throughout the economy.
The greening of the economy will only succeed if measures are implemented to support the greening of VET!
Context and description of IO3
By developing the new GreenEntreComp and designing business modelling resources for circular economy businesses, the Green-4-Future project proposes two significant innovations that will directly impact the provision of VET.
Supporting these new innovations with bespoke in-service training for VET tutors is both practical and logical. VET tutors cannot be expected to substantially change their prevailing entrepreneurship

IO4 MASSIVE OPEN ONLINE COURSE
The Green for Future MOOC will be the one stop shop that will connect an interactive the Greened EntreComp to Business Practices and the InService Training for Academics.
It needs to look simple and intuitive
It needs to be well thought out and to connect the main output IO1 to the practices (IO2) and the curriculum (IO3)
